

8778 Gourmet 1000™ Pour-Over Thermal Coffee Brewer

Gourmet 1000 Thermal Coffee Brewers offer volume brewing, proper extraction and holding capacity. Traditional electromechanical controls and a high level of component compatibility mean many years of dependable, quality brewing. These uniquely designed units allow for increased brew volumes. Coffee is brewed into a thermal server which is easily transportable to remote serving areas where coffee will remain preserved for optimal temperature and taste.

Features

- A high level of commonality of parts with other Bloomfield models will significantly reduce the inventory of spare parts required to service many body styles.
- Exclusive design provides easy access to components for quick service.
- Ready-to-Brew light indicates the proper water temperature to help eliminate the guesswork in brewing.
- One-piece drawn stainless steel water tank has a superior design for extended life.
- Premium quality thermostat has a full-length stainless steel sensing bulb that recognizes water temperature extremely accurately and cycles less frequently.
- Superior sprayhead design spreads water over the coffee grounds, creating agitation and a floating action that completely saturates the coffee to capture the full, rich essence.
- Brews up to three liters for volume flexibility.

optional 7750*

- Rugged base rails provide stability and strength, while minimizing brewer height and locating placement of thermal server.
- High quality easy to clean stainless steel construction.

Accessories

Bloomfield offers a full line of airpots, thermal servers and coffee grinders.
