

CUSHION STATION

anti-fatigue

FEATURES AND BENEFITS

- Highly durable and dense closed cell Nitrile rubber foam combined with uniquely designed construction affords excellent anti-fatigue properties.
- Grease and Oil proof. Anti-Static.
- Available with or without holes for use in wet or dry areas.
- Treated with anti-microbial agent for lifetime protection against odors and degradation.
- 7/16" Thick; available in standard sizes up to 20' long.
- Flexible Nitrile Foam construction can be cleaned easily.
- Safe to use at welding stations.
- Can be autoclaved sterilized.
- Cushion Station mats are ideal for use in medical facility environments (i.e. operating rooms, delivery rooms, etc.) kitchens, locker rooms, machine shops, work stations, or other heavily industrial applications.
