Additional 2 Year Compressor Warranty

MARKETMAX™ GLASS DOOR ICE MERCHANDISER

Single section glass door ice merchandiser with lighted sign panel used for merchandising and storage of ice.

CABINET CONSTRUCTION

Heavy duty construction includes white coated steel interior walls. White or black exterior finishes are heavy-duty steel with a baked on durable coating.

Foamed-in-place CFC and HCFC-free polyurethane insulation.
Modern, one-piece grille is easily removed for cleaning and servicing.

Freezer model features heated triple pane glass. Inside and outside panes are tempered for added safety. Anti-microbial door handles are standard. Door provides automatic hold-open feature.

Brightly lighted sign panel.

STORAGE CAPACITY

Raised interior floor rack and backguard prevents bags of ice from blocking proper airflow.

Holds (54) 8 lbs. (4 kg) bags of ice.

ELECTRONIC CONTROL

Electronic thermostat with manual defrost button provides a digital display of cabinet temperatures, which includes status indicators and key pad for any necessary temperature adjustments.

REFRIGERATION

Self-contained bottom mount refrigeration system. Expansion valve refrigerant control on freezer provides quick temperature pull down and reduces compressor run time—meaning reduced energy consumption. Includes automatic condensate disposal. Freezers utilize ozone friendly R404A refrigerant and its defrost system is fully automatic, time-initiated and temperature terminated operation.

Freezer product temperatures from 20°F to 25°F (-6.6°C to -3.8°C).

ELECTRICAL

Interior fluorescent lighting enhances product illumination. Optional LED lighting provides hidden light source for increased product visibility. LED bulbs last up to 10 times longer compared to fluorescent bulbs and renders additional energy savings due to reduced wattage load on compressor.

Freezer units wired at factory and ready for connection to a 115/60/1 phase, 20 amp dedicated outlet. 8' long cord and plug set included.
