### Dual Automatic Thermal Coffee Brewers

Models:  8795-TF  8790-TF

(Thermal servers sold separately - model 7757)

### APPLICATION

With an eye for detail and a mind toward simplicity, we have designed a new thermal system that is an ultra-reliable mechanically controlled brewer. Volume brewing has never been easier nor has a thermal brewer of this quality ever been available at such a value price. Our electro-mechanical thermal brewer may be the old tradition in brewing, but its superior engineering and proven technology is timeless.

### FEATURES

- Proven electro-mechanical controls provide simplicity of brewing and exceptional quality coffee.
- The two brewing volumes of 1 gallon and 1 1/2 gallon will accommodate fluctuations in demand.
- Exclusive design provides easy access to components for quick efficient service.
- Ready-to-brew light indicates the proper water temperature to help eliminate the guesswork in brewing.

- Premium quality thermostat has a full-length stainless steel sensing bulb that recognizes water temperature accurately and cycles less frequently.
- Independent front-mounted hot water faucet allows drawing of hot water without affecting coffee taste or brewing cycle.
- Unique water valve with built-in flow control assures consistent operation at 20-80 p.s.i.
- Superior spray head design spreads water over the coffee grounds, creating agitation and a floating action that completely saturates the coffee to capture the full, rich essence of every bean.
- Liquid level sensor and brew valve perform consistently with low or fluctuating water pressures.
- High quality easy to clean stainless steel construction.
- 5.7 liter thermal servers sold separately.
- Most parts interchangeable with the standard line of brewers.

### OPTIONS/ACCESSORIES

- Drip tray
- 5.7 thermal servers - model 7757 & 7757-D
- Stainless steel brew basket - model 82533
- Filter paper, 500 per case, 250 per bag- model 8706-110

### PRODUCT WARRANTY

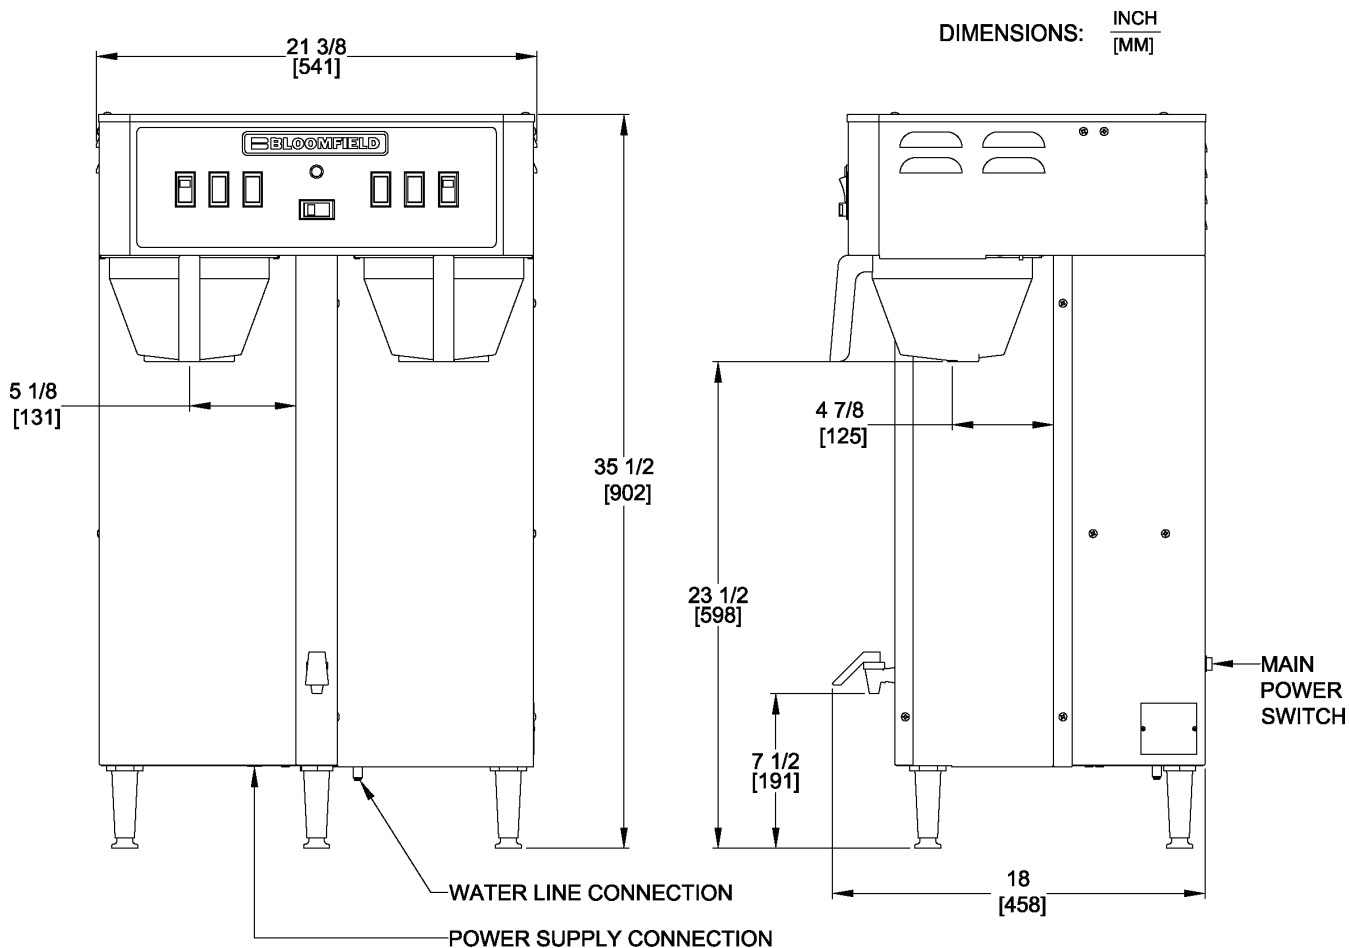

Limited two year parts & one year labor
