## The Decanter Timer From Bloomfield— A New Timing Device That Monitors Coffee Freshness.

If fresh-brewed coffee is a critical factor in the success of your operation, Bloomfield has developed a timing device that will keep your coffee-drinking customers coming back.

Easy to read and simple to use, the Decanter Timer snaps onto the lip-band of any coffee decanter. Employees set the dial for the approximate time when unused coffee becomes stale from standing on a heated burner. When the clock on the wall matches the time on the clocking device, employees know to brew fresh coffee.

The Decanter Timer is just another product designed by Bloomfield to help foodservice operators provide customers with better tasting coffee cup after cup.

8950—24 Pack—Regular
8951—3 Pack—Regular
8952—24 Pack—Decaffeinated
8953—3 Pack—Decaffeinated

### Decanter Timer Features:

- Device fits around lip-band of most decanter models
- Timer is easy to set, easy to check
- Clasp removes easily for cleaning or transfer to another decanter
- Device does not interfere with pouring performance

# Brew-Thru Decanter Lid From Bloomfield Limits Coffee Break-Down and Extends Fresh Flavor

---

The new Brew-Thru Lid is another product innovation designed to better satisfy your coffee-drinking customers.

Designed to fit snugly into the mouth of a Bloomfield decanter, the Brew-Thru Lid easily pops in and out. When brewing a fresh pot of coffee, simply pop the lid into the decanter. Coffee is brewed directly into the decanter through the narrow opening in the lid. The limited amount of air reaching the fresh-brewed coffee through this narrower opening means less coffee break-down, and increased fresh flavor.

In addition, the Brew-Thru Lid helps maintain coffee temperature and provides better pouring control when serving.

8916—Black (Regular)—12 per carton  
8918—Brown (Regular)—12 per carton  
8920—Orange (Decaffeinated)—12 per carton

## Brew-Thru Lid Features:

- Lid easily pops in and out of decanters
- Easy to clean
- When pouring, lid provides better control over spills
