

LETTUCE & HERB

Hanging Aeroponics System for
Small and Medium Plants

Description

This **HHA3211-F48** Aeroponics indoor grow system is great for herbs, lettuce, and cloning. It includes a triple tray with three 48 watt 120 volt T5 lights. This is a full spectrum light, but contains mostly the blue PAR range for growth. Great for small plants, and non-fruiting horticulture. This is a nice addition for natural lighting on cloudy days.

Designed for small to medium sized plants like lettuce, spices and herbs.

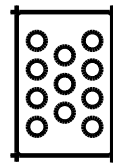

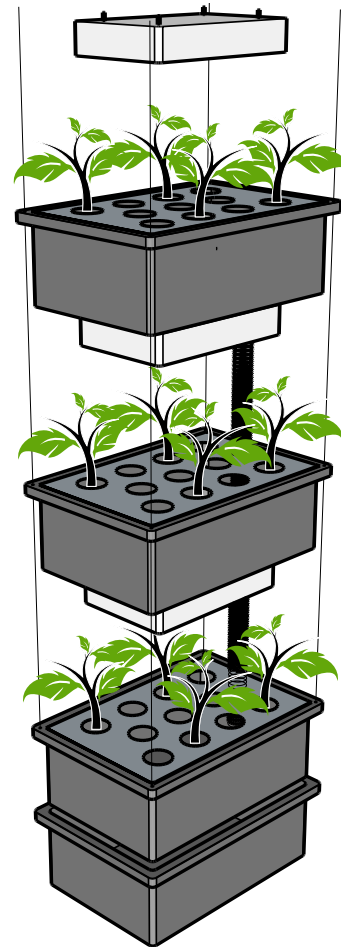

Custom hanging frames available. Every system can easily be configured.

Patent Pending

- *Easy-to-use and Looks Great*
- *Unbreakable trays with lifetime guarantee*
- *Cost-effective*
- *Grows plants up to 4 times faster*
- *LEDs are 25 times more efficient*
