## DESIGNER LINE SANDWICH UNIT

## Model: DL32-8-FB-D

## 32" Standard Top Sandwich Unit Refrigerator with Drawers - 8 Pans Front Breathing

Stainless steel exterior and interior.
Certified under NSF-7 to maintain temperatures in $86^{\circ} \mathrm{F}$ ambient and designed to maintain NSF-7 temperatures in $100^{\circ} \mathrm{F}$ ambient.

## Standard Model Features

## REFRIGERATION SYSTEM

Performance-rated refrigeration system
Environmentally-safe R-134a refrigerant
Unique air flow distribution allows
pan product to maintain $33^{\circ}-41^{\circ} \mathrm{F}$
Automatic, energy saving, non-electric
condensate evaporator
Non-corrosive, plasticized fin evaporator coil
Easily serviceable, back mounted compressor

## CABINET ARCHITECTURE

2" non-CFC polyurethane foam insulation
Magnetic snap-in drawer gaskets
12" deep, full length nylon cutting board
Stainless steel roll-out drawers
Insulated lid
3 5/8" casters
Completely enclosed, vented and removable case back

## MODEL FEATURES

(8) $1 / 6$ size non-recessed pans, 4 " deep

Interior hanging thermometer
Front breathers are a unique, field assembled, bottom mounted ventilation system designed to allow cabinets to be flush against a wall or built into a counter to conserve space.

## REFRIGERATION SYSTEM

Self-contained refrigeration system is rear mounted, concealed behind a removable louvered cover. Full-length front air grille allows for even air circulation to condensing unit. A "performance rated", air-cooled, hermetically sealed, capillary type refrigeration system is installed in model. Plasticized finned coil and air circulating fans are contained within an easily accessible rear mounted housing. Unique airflow design allows the cabinet to be enclosed on both sides or mounted flush against a wall. Refrigeration system, fully charged with R134a refrigerant, is designed to maintain $38^{\circ}-41^{\circ} \mathrm{F}$ while operating with an unrestricted air supply in an ambient temperature of $100^{\circ} \mathrm{F}$. All condensate water is directed to a non-electric condensate vaporizer located in the compressor compartment, no plumbing is required. A strict quality assurance team inspects all materials and components to certify the model conforms to the most exacting standards. Model is performance tested for a minimum of 16 hours prior to crating.

## INSULATION

All cabinet walls, top and bottom have high density, foamed-in-place, non-CFC polyurethane insulation.

## CABINET CONSTRUCTION

Materials are top quality, assembled under rigid supervision conforming to strict quality assurance requirements. Case is welded metal construction, internally supported and braced for rigid unit construction. Exterior, interior and worktop are heavy gauge polished stainless steel. Design eliminates overlapping panels with raw edges. Interior corners are rounded with $1 / 4^{\prime \prime}$ radius. Joints and seams are vapor-tight sealed. Easily removable anti-sweat door heaters, concealed by non-metallic, non-conductive, high impact thermal breaker strips, eliminates condensation build-up on case front.

## DRAWER CONSTRUCTION

Fronts/backs are constructed of heavy-gauge, polished stainless steel with heavy-duty, safety grip, chrome plated handles. Drawer fronts are insulated with non-CFC polyurethane foam insulation. Full extension, lift-out frames are heavy gauge, welded stainless steel mounted on heavy-duty, easy glide, self closing slides. Self adjusting, full perimeter, magnetic snap-in gaskets guarantee a positive seal.
