CHICAGO METALLIC ITEM #44800

Chicago Metallic's **Seamless Corner Perforated Aluminum Baking Sheet** is more sanitary and easier to handle than traditional notched-corner pan designs.

BAKING CHALLENGES

Employee safety, food safety, and product durability are three very important concerns in every baking operation. Imagine a product that is safer for employees to handle, is more sanitary, and lasts longer, and you have a product worth talking about.

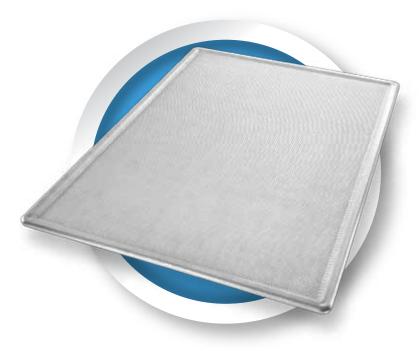

BAKING SOLUTIONS

Safer Handling – The baking sheet's seamless corners are safer to handle since there is no possibility of sharp edges as are often found on notched-corner pans.

Safer, Long Lasting Product – The seamless corner design reduces the possibility of the corners opening and metal fragments contaminating product.

Better Sanitation – Our proprietary process enfolds the wire in the rim, virtually fusing the two pieces of metal and preventing water from getting under the rim... not to mention providing unprecedented corner strength.
