

# GREEN HEAT™

*The greener way to heat. More heat, less waste.*

Available in 1, 2 and 3 hour solutions, this exciting, new heating fuel offers foodservice customers an environmentally-friendly option for their businesses. GREEN HEAT's concentrated gel formula is created from plant-derived, corn-based ethanol. Fully sustainable and renewable, GREEN HEAT™ is biodegradable and does not contain any toxic, poisonous, methanol-based denaturants.

Guaranteed to meet the high standards of professionals, GREEN HEAT™ has earned approval as an environmentally-preferred product from the Enviro Kleen™ "Green" certification program. It's been tested and proven to be THE environmentally friendly chafing fuel for foodservice operators everywhere.

## TRULY "GREEN"

- Plant derived ethanol; fully sustainable and renewable.
- Biodegradable, non-poisonous green gel fuel.
- A "green" approach to product and packaging.
  - 1-Hour Room Service – more burn time than typical room service gel, uses 21% less packaging and space.
  - 2-Hour Fuel – up to 2-hour burn time per can using 29% less space and packaging.
  - 3-Hour Fuel – 33% more burn time than 2-hour gel fuel in the same size can.

## GUARANTEED PERFORMANCE

- Burns strong and keeps foods hot – meets the high standards of professionals.

## COMPARATIVELY PRICED
