A Star is Born!

Middlefield, CT – November 1, 2004. Cooper-Atkins Corporation announces the release of their new timer the TFS4 Multi-Station Digital Timer.

TFS4 is a high-performing and durable multi-station timer that has 4 different timer modes which can be used independently or simultaneously. The large LCD and flashing lights allow for easy viewing. Four distinctive alerts with adjustable volume control permit you to hear the timer from across a large room, making it the ideal timer for noisy work environments.

The TFS4 features color-coded LED with distinctive beepers for each timer and coordinating keypad buttons. It features count-down/count-up, switchable Minutes/Seconds or Hours/Minutes and recall. The TFS4 is made from durable ABS plastic housing. Non-skid rubber feet or wall mounting keep the timer secured, and its keypad is grease resistant and splash-proof. A one-touch START / STOP button is located at the top of the unit for quick and easy operation.

Carol P. Wallace, President and CEO of Cooper-Atkins Corporation and President-Elect of the North American Association of Food Equipment Manufacturers (NAFEM), is excited about the future of Cooper-Atkins. "The introduction of our latest product ensures that we will continue to provide our dedicated customers with affordable solutions for every measurement challenge – from bimetal pocket tests and timers to handheld thermocouple units to our high-tech wireless temperature monitoring systems. When professionals are faced with measurement challenges they will continue to look to Cooper-Atkins to provide solutions tailored to the needs of their business."
