

PCB-36 with GT-30/36

PCB-60 with GT-48/60

Models

PCB-30 PCB-36
PCB-48 PCB-60
Portable Charbroilers

Specifications

Our grill bodies, legs, cooking grates, burners, under shelves, radiants, water pans, fasteners, pilot tubes, are all 304 series stainless steel for durability and ease of cleaning. Compared to units made of metal or 430 stainless steel – our units will never rust.

15,000 BTUH stainless steel burners are placed every 5.75" to ensure the most even heat pattern possible. These units heat up to cooking temperature within 6 minutes and will reach 800 degrees in 10 minutes. Our stainless steel burners and stainless steel cooking grids are warranted for 10 years!

Each PCB model includes a quick disconnect gas hose with regulator for propane tanks. Models PCB-48 and PCB-60 come with two gas hoses. The PCB-48 and PCB-60 are also available with a single gas connection and optional 25' quick disconnect hose for use with a remote tank.

PCB models include protective crash bars on each end of the unit and upper and lower crash bars on the front of the unit. The PCB units are designed to stack on top of each other and the optional tables will also nest and stack on top of the grills during storage and transportation.

Specification:

Gas grill - must be constructed of 304 Stainless steel – including cooking grids, burners, and all fasteners. Burners to be 304 stainless steel and a minimum 15,000 BTUH per burner. Minimum of 10 year warranty on cooking grids and burners and minimum of 1 year warranty on complete unit. Unit to include stainless steel water pan(s) with drain port(s). Units must be able to nest/stack on top of each other. CGA/AGA/NSF certified.

Standard Features

- All stainless steel construction; including grids, burners, and fasteners.
- CGA/AGA/NSF certified.
- Crash bars on ends/front of unit.
- 15,000 BTUH stainless steel burners.
- Stainless steel pilot burner tube system.
- Unibody design for lighter weight and added strength.
- Stack for ease of storage/transportation.
- 14 ga. stainless steel radiants that remain in place during transportation and cleaning.
- Optional folding tables that will nest/stack on top of grills for storage/transportation.
- Two stage regulator(s) and hose(s).
- Lighter and grill cleaner.
- Water pans with drain ports to ease cleaning and eliminate grease fires from occurring.
- Ships completely assembled on a skid. Ready to use.
- Factory technician tested prior to shipping.
- 1 year parts and labor limited warranty.
- 10 year warranty on cooking grids and burners.

Options/Accessories

Folding leg table (GT-30/36 and GT-48/60)

Roll Dome	Adjustable Bun Rack
Griddle Plate	Steam Pan Adapter
Side Shelf	Rotisserie
Wind/Splash Guard	Smoker Box
Perforated Grill Plate	Charcoal Tray
Remote Propane Cart	Propane Tanks
