Specification Line[®]: Solid Door Heated Pass-Thru

Models

One section	Two section	
SSHPT1-S	SSHPT2-S	Stainless exterior and interior full door
SSHPT1-SH	SSHPT2-SH	Stainless exterior and interior half door
SAHPT1-S	SAHPT2-S	Stainless exterior and aluminum interior full door
SAHPT1-SH	SAHPT2-SH	Stainless exterior and aluminum interior half door
SMHPT1-S	SMHPT2-S	Stainless front aluminum exterior and interior full door
SMHPT1-SH	SMHPT2-SH	Stainless front aluminum exterior and interior half door

SSHPT2-SH

Standard Features

- Stainless steel interior and exterior (SS)
- Stainless steel exterior, aluminum interior (SA)
- Aluminum interior and exterior, stainless front (SM)
- Built in door locks with heavy duty strikes
- Recessed metal door handle
- Exterior red Led digital thermometer
- Easy to use electronic control
- Easy access "flip up" shroud
- High density foamed in place environmentally friendly, Kyoto Protocol Compliant, Non ODP (Ozone Depletion Potential), Non GWP (Global Warming Potential) polyurethane keeps energy costs low
- Three chrome plated wire shelves per section
- 6" adjustable stainless steel legs
- Stainless steel breaker strips
- Stainless steel interior door liner
- Three year parts and labor warranty

Options & Accessories

- Security (prison) package
- 6" polyurethane casters
- Door field rehingability
- Additional shelves
- Tray slides
- Laminate on front, sides and back
- Bottom mount electrical
- Stainless steel banking strip
- Heat shield end
- Stainless steel kick plate
- Laminate kick plate
- 4" stainless steel utility base

Specifications

Exterior: SS and SA models shall have corrosion resistant stainless steel exterior cabinet sides, front and shroud. SM models shall have corrosion resistant aluminum on exterior cabinet sides and will have stainless front and shroud. All units shall have the upper shroud hinged with a gas assist stay open feature to provide easy access to the refrigeration system.

Interior: Cabinet interior shall be corrosion resistant stainless steel (SS models) or heavy gauge aluminum (SA and SM models). Bottom and top surfaces shall be die stamped to provide radius corners and recessed floor. Three wire shelves are provided per section, standard shelves are chrome plated. Shelves rest on clips which are adjustable on 1" increments on stainless steel pilasters affixed to the cabinet interior. Pilasters are removable without tools for cleaning. Mounted to the interior ceiling, the interior incandescent light is controlled automatically through a switch mounted in the hinge assembly to protect against breakage. Door openings are protected with heavy gauge stainless steel breaker strips. An air duct shall be mounted to the ceiling assuring low velocity, even air movement throughout the cabinet interior.

Doors: Exterior shall be corrosion resistant stainless steel. Interior liner shall be stainless steel. Each door has two edge mount, self closing, cam lift style hinges. Doors can be removed from the cabinet without the use of tools. Metal door handle shall be recessed into the door for easy grip without impacting aisle space. Keyed door lock is mounted in the door next to the handle. Lock engages into a heavy duty strike mounted to the cabinet face. Door gaskets are magnetic and mount to the door snapping in place and are removable without tools.

Heating system: Cabinets are designed to maintain temperatures between 120°F and 200°F. Heating elements are helical shaped, with tubular fins. High speed blower provides uniform airflow in the cabinet. Entire heating system is mounted to the exterior of the cabinet ceiling, outside the food zone. It is assembled as one piece and can be removed as one piece. Temperature is controlled by an adjustable electronic thermostat. System on/off switch is located on the front exterior of the cabinet.

Electrical: Standard electrical is 120/208-240 Volt, 60 Hz single phase. Connection must be hard wired to junction box on the exterior top of the cabinet.
