# CITRUS JUICER PA96

## • BARS • HOTELS • RESTAURANTS

### DESCRIPTION:

- Entirely designed in plastic, this appliance includes a turning extractor cone (1500 rpm).
- A manual pressure on the fruit is necessary.
- The start of the citrus fruit press is executed with assistance of a switch.
- This appliance is noiseless and sturdy.

### PERFORMANCE:

- The press will handle lemons, oranges or grapefruit.
- Its output is 50 to 100 oranges per hour.

### SAFETY:

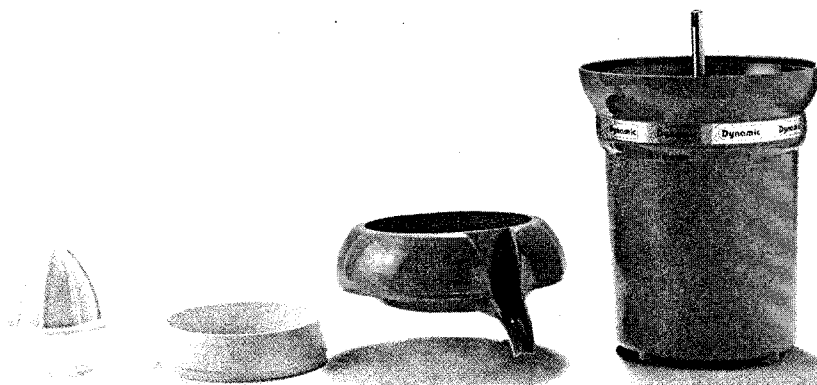

- The appliance is grounded in accordance with safety standards.

### MAINTENANCE AND HYGIENE:

- Thanks to a sliding grille, only a few minutes are required for a partial cleaning.
- The dismantling for total cleaning of the appliance requires less than one minute.
- All pieces in contact with juice are made of plastic.

### CHARACTERISTICS:

- |                    |                                     |
