

MICROGARD™

for Hand Sinks

hand sink with MICROGARD™

Item #:	_____
Model #:	_____
Project #:	_____
SIS #:	_____

MICROGARD™:

- MICROGARD™ is an antimicrobial agent which contains built-in protection to retard the growth of a broad range of bacteria, mold and mildew on the surface that cause stains, odors and degradation.
- MICROGARD™ combines inorganic antimicrobial silver ions with a patented delivery system. The patented delivery system triggers the release of silver ions which react with bacteria in three ways:
 - 1) suffocates the cell,
 - 2) stops the cell reproduction system,
 - 3) stops the cell from growing.
- MICROGARD™ is a second line of defense. In keeping with good hygiene practices, clean this product as usual. The protection will not wash out, while organic bactericides may.*
- Note: To clean, use mild soap and water, rinse, and wipe entire surface dry. Soft abrasive cleaners may be used when necessary. Strong abrasive cleaners will scratch and dull the surface.

Hand Sinks:

- Over 30 models of hand sinks to choose from.
- Heavy duty type 304 stainless steel all-welded construction.
- Inverted "V" edge rim retards spillage.
- Unique deep-drawn positive drain bowl assures complete drainage to meet the most stringent health code requirements.

HOW TO ORDER MICROGARD™ ON HANDSINKS:

To order, add suffix "-MG" to model number (example: HSA-10-FE-B-MG) and \$35 to list price of handsink.

* MICROGARD™ does not protect users or others against bacteria, viruses, germs or other disease organisms. Always clean this product thoroughly after each use.
