FEATURES • BENEFITS

Effectively filters dirt and particles as small as 1/2 micron in size by mechanical means

Utilizes depth filtration and Fibredyne™ media for superior dirt-holding capability

NSF/ANSI Standard 53 certified to reduce cysts such as *Cryptosporidium* and *Giardia* by mechanical means

Leaves chlorine and chloramines within water that is supplied to equipment which helps to reduce slime growth in ice machine and ice bin

Reduces ice machine maintenance, service costs and downtime caused by scale buildup which can result in the clogging of distribution lines, malfunction of probes, floats, pumps, solenoids and valves, and higher energy consumption (as tested by Everpure)

Sanitary cartridge replacement is simple, quick and clean; internal filter parts are never exposed to handling or contamination

Designed for use with Pentair® Everpure Insurice® & Insurice PF Manifold Systems

INSTALLATION TIPS

Choose a mounting location suitable to support the full weight of the system when operating.

Never use saddle valve for connection.

Use 3/4" water line.

Do not connect system to water-cooled condenser.

Install vertically with cartridges hanging down and allow 2½" (6.35 cm) clearance below the cartridge for easy cartridge replacement.

Flush cartridges by running water through system for five (5) minutes at full flow.

OPERATION TIPS

Change cartridges on a regular six (6) month preventative maintenance program.

Change cartridges when capacity is reached or when flow becomes too slow.

Service flow rate must not exceed 3.5 gpm (13.25 Lpm)

Always flush the filter cartridge at time of installation and cartridge change.

Inspect Everpure EC210 Cartridge periodically to determine dirt load.

Replace Everpure EC210 Cartridge when dirt has penetrated through to the inner core of the cartridge.
