## 1 - Locating the ice machine

Horizon self-contained Chewblet ice machines allow top-mounting or mounting in a base cabinet, on a wall or on a floor stand up to $75^{\prime}$ ( 22.8 m ) from the dispenser or ice bin with RIDE technology ( $10^{\prime}$ ( 3 m ) for Micro Chewblet ice). In-cabinet mounting (RIDE applications) require special attention to service access, unit ventilation and ice tube runs (see pages 4-7).

## 2 - Undercounter/in-cabinet mounting

## 3 - Undercounter/in-cabinet mounting and ventilation

## Using Follett supplied grilles

Horizon ice machines can be installed undercounter/in-cabinet to fill bins or dispensers using RIDE technology. Care must be taken to ensure proper cabinet venting to avoid recirculation of hot air. Improper venting can cause ice machine outages.

18.00 "W x 14.00"H ( $45.72 \mathrm{~cm} \times 35.56 \mathrm{~cm}$ )

## Important specifier notes for using Follett supplied grilles:

1. The supplied exhaust grille must be located at least 18.00 " ( 45.7 cm ) from the supplied air intake grille (exhaust air must not recirculate with intake air).
2. Cabinet interior must be open to allow for unrestricted exhaust air flow.
3. Ice transport tube needs minimum $1 / 4$ " per foot ( 2 cm per meter) pitch toward ice machine and should be secured to prevent dips and traps from forming.
4. Cabinet door must mate directly to air intake gasket.
5. Cabinet interior must provide a minimum clear space of 24.50 " deep ( 62.2 cm ) by 22.25 " high ( 56.5 cm ).
6. Cutout for supplied grilles must meet minimum size requirements shown above.
7. Utilities should be conveniently located as shown.

## 3 - Undercounter/in-cabinet mounting and ventilation (continued)

## 4 - Horizon ice machine mounting accessories

Important specifier notes:

1. For secure wall mounting, specify optional wall mount bracket.
2. Wall and fasteners must support the weight of the ice machine, bracket, supply water and ice. Use of a backing board may be required with hollow wall construction.
3. Machine stand mounting adds $6.88^{\prime \prime}$ $(17.48 \mathrm{~cm})$ to height of ice machine.
4. No dips in tube routing allowed.
5. Ice transport tube needs minimum $1 / 4$ " per foot ( 2 cm per meter) pitch toward ice machine and should be secured to prevent dips and traps from forming.
