SERC, SER-680 wired independently*	7	34	29	29	25	15	15

Installation Notes:

Clearances from combustible surfaces should be minimum 7" (178mm) from sides, 2" (51mm) from back

*Note: 3 phase ratings apply to SERC and SER-680 ordered separately. When a range and salamander are ordered together it is standard for the salamander to be prewired at the factory to interconnect with the range (single phase). For further information on ratings and connection options consult the factory.

KW Ratings

Total kW loading is 7.0 kW
