Product Information

Degree corner drainboards are all 24" deep and designed to mount between two pieces of Choice underbar. However, corner drainboards can be used to mount between any two stable vertical surfaces. Corners should not be mounted to objects that are mobile or on casters.

Because they are intended to mount between two vertical surfaces, corner drainboards do not come with legs. If one side of the corner does not have a vertical surface on which to mount, then a leg set must be ordered as an accessory.
