Hatco Glo-Ray® Designer Infrared Foodwarmers safely keep all hot foods at optimum serving temperatures longer. Foods do not dry out or become discolored; even delicate dishes hold that "just-prepared" look. The Glo-Ray pre-focused heat pattern directs heat from a tubular element to bathe the entire holding surface.

FLEXIBILITY

The continuous aluminum housings, up to 88" (2235 mm) in width, are very strong and eliminate the danger of sagging.

The advanced Glo-Ray Dual Mounting feature allows side-by-side mounting of two warmers to provide a deeper holding area. A 3" or 6" (76 or 152 mm) spacer is available.

Optional sneeze guards, made of shatterproof, easy-to-clean acrylic, are available, providing a safe environment for the food. Check NSF standards and local codes for requirements.

Many combinations of remote control enclosures are available in several sizes, built in accordance with UL Standards to accommodate power switches, infinite controls, indicator lights, and wiring. **Remote control installation is required on all Designer foodwarmers.**

Designer color food warmer and inset panels allow the unit to match the surrounding décor. The powdercoated surfaces provide durability and are easy to clean.

QUALITY

The following features ensure the finest performance for years to come:

- Available in widths from 22" to 88" (559-2235 mm).
- Sturdy continuous aluminum housings eliminate sagging.
- Pre-focused heat maintains safe serving temperatures longer without continuing to cook the food.
- Variety of models, configurations, colors and accessories provide unlimited flexibility.
- Optional coated shatter-resistant incandescent or halogen lights enhance product displays while safeguarding food from bulb breakage.

Model GR2AHL-48D

Model GR2AHL-24 with optional sneeze guards

Model GR2AHL-36 with Designer legs for hanging installations

Remote Control Enclosures

Model RMB-D with toggle switches and optional Designer color

Model RMB-7L with one toggle and one infinite
