NOTICE:

- Failure to replace cartridge before end of capacity life can result in pitting, rusting and discoloration due to Chloramines and Chlorine in water supply.
- Routine filter replacement & deliming are required for warranty consideration.
- This filter does not remove scale build-up due to hardness or other contaminants that may be in water.
- Hardness will result in scale build-up. Deliming is required to remove scale build-up or use of an additional treatment such as a water softener is recommended.
- Gallon capacity will vary according to flow rate, inlet pressure and local water conditions.
- Replace cartridge if outlet pressure gauge is less than 20 psi. or before end of capacity life (Maximum cartridge operating life 1 year.)

Water Quality Statement

The fact that a water supply is potable is no guarantee that it is suitable for steam generation. Systems are not to be used where water is microbiologically unsafe or with water of unknown quality without

adequate disinfections before and after use. Other factors affecting steam generation include iron content, amount & type of chlorination, and dissolved gasses. Water supplies vary from state to state and from locations within a state.

As with all steam related products, water filtration and regular filter replacements coupled with routine Deliming are required. Your local Hobart office can recommend a water treatment or filtration system to meet the needs of your local water conditions. Contact your local Hobart representative for water treatment offerings.

Note:

- Installation of backflow preventers, vacuum breakers and other specific code requirements is the responsibility of the owner and installer in compliance with local codes.
