LX18, LX30, LX40 – Front opening, undercounter models. Choice of Hot Water or Chemical Sanitizing units. Stainless steel tank, door and top panel. Solid state controls. Choice of 18, 30 or 40 racks per hour models.

LXG – Same outstanding features as basic LX models. Specifically designed raised door opening for behind-the-bar efficiency. 12" high chamber. 40 racks per hour. 1.2 gallon fresh-water rinse per rack.

AM-14 (TWO DOORS WITH FRONT INSPECTION DOOR) Straight Thru Type, AM-14C (CORNER TYPE) – Semi-automatic Rack Type with all solid state electronic control system. Stainless steel tank, wash chamber, and frame. Door cycle switch for automatic operation, two each PEG and COM heavy-duty racks. Available with built-in 10 KW booster heater. Also available in **AM-14F** front loading models and **AM-14T/AM14TC** tall models featuring dual purpose design...optimum washing of dishes and utensils.

FULLY AUTOMATIC RACK-TYPE DISHWASHER – Flexible strip curtains. Stainless steel wash chamber and tank. Welded steel painted frames. Solid state electronic temperature controls with positive low water protection. All fixed wash arms—no rotating.

There are 16 different "C" Line Models to choose from. All available with either gas, steam or electric heat. Options include steam condenser, blower-dryer, prewash unit, vents, stainless steel trim, common drain connection. Even an automatic shut-off timer. Also available in an energy saving model with efficient low-temperature chemical sanitizing.

Begin with a Hobart C-Line Dishwasher. Add any of the optional extras, such as a prewash unit, timed fill, a foodwaste disposer, or a waste equipment system. Include an optional blower-dryer, or condenser, and any one of a number of convenient shelves and other accessories. Finally, add dish tables for the soiled and clean areas in a configuration to meet your specific requirements and the automatic rack transport system and you've got one of the most efficient labor saving warewashing systems available.

Model FT800S When big capacity and speed are required. Choice of many models in various sizes, capacities and speeds... cleans from 5,000 to 13,043 pieces per hour.

As continued product improvement is a policy of Hobart, specifications are subject to change without notice.
