

MODEL J

Electric Booster Heater

For Use In Commerical Kitchens And Restaurants To Supply 180°F Sanitizing Rinse Water

FEATURES

Heavy Duty Construction

- ✓ All stainless steel tank construction does not require an internal lining
- ✓ ASME Section VIII stamped construction provides for extended tank life
- ✓ Exterior surfaces including the jacket, base and front cover are all brushed stainless steel for improved appearance and longevity

Advanced Design

- ✓ Advanced electronic temperature control with digital display confirms at a glance proper operation and temperature setting
- ✓ Visual indication of exact setpoint temperature as well as fault conditions provides instant feedback
- \checkmark Electronic leak detection system notifies user in the event of an internal water leak
- Factory packaged resettable circuit breakers for internal over current protection save time and money compared to one shot fuses
- ✓ A bronze body (not cast iron) pressure reducing valve is factory supplied with each booster.
- Designed for ease of service, no electrical component needs to be removed to replace any other part

Reliable

- Overall dimensions and connection locations are compatible with other popular brands to facilitate direct replacement without modification to the existing plumbing.
- ✓ Environmentally friendly CFC/HCFC free closed cell foam insulation minimizes tank heat loss for maximum operating efficiency and reduced operating costs

A Long Lasting Booster Heater

The Hubbell J Model is the longest lasting booster heater available because it utilizes a heavy duty ASME Section VIII designed, constructed and stamped all stainless steel tank which does not require an internal tank lining. Other manufacturers use a non ASME steel tank with an internal lining which is easily eroded in high temperature water and eventually leaves the bare steel tank exposed to the corrosive effects of water. Once this occurs it is only a short time before a steel tank will begin to rust, leak, and need replacement. Hubbell did not stop at improving just the tank design. For improved appearance and longevity the Hubbell booster

- Screw plug elements with O-ring gasket reduce leakage problems associated with less reliable and more difficult to service flange type heating elements.
- Full ten (10) year (non pro-rated) tank warranty

comes standard with a brushed stainless steel outer jacket and base which is impervious to the corrosive effects of water and looks great in your kitchen. The Hubbell booster is also equipped as standard with the advanced functionality of an electronic temperature controller to provide accurate, reliable and energy efficient operation while simplifying service work. The Hubbell booster's closed cell foam insulation also improves operating efficiency and reduces the cost of operation. When you specify and install a Hubbell booster heater, you will have confidence in knowing that the owner will be provided with a long lasting and trouble-free source for 180°F water.

The Hubbell Booster: A Leap Ahead

Why Install A Hubbell Booster Water Heater?

3

Improved Longevity

The Hubbell booster heater is designed to provide many years of operation. The tank is all stainless steel construction and is designed, constructed and stamped in strict conformance to ASME Section VIII.

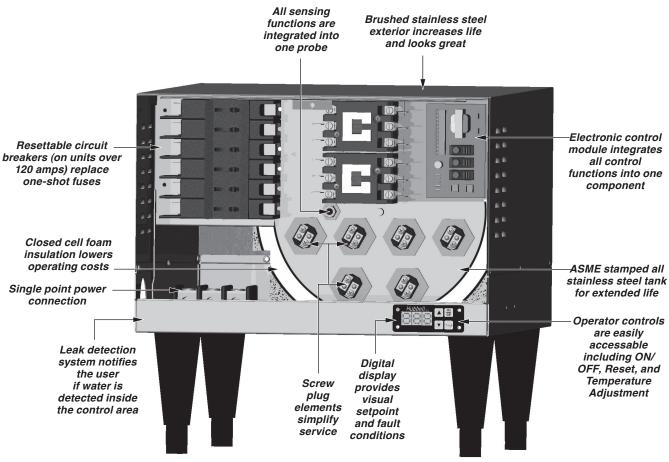

Lower Operating Costs

2

The Hubbell booster tank is encapsulated in environmentally friendly CFC/HCFC free closed cell foam insulation to minimize stand-by heat loss. This high quality insulation reduces heat loss compared to fiberglass type insulation found in other brands. The result is that an average Hubbell booster heater owner can expect to save over 2,000 KW/Hrs compared to other brands.

Reduced Service and Maintenance Costs

Hubbell has greatly simplified booster heater service and maintenance through numerous advancements in booster design and controls. The Hubbell controller is a major step forward with improved ease of use and service. The digital display provides the owner and technician with an exact setpoint temperature as well as visual error indication. Because the controller can be set to the exact desired temperature in degrees - there is no more hotter/colder calibration. It also includes a leak detection system to notify the user in the event of an internal leak. For further ease of service and maintenance, all controls are mounted such that when a component is removed for service no other component needs to be removed, and all sensing functions have been consolidated into one probe, which can be replaced without draining the tank. The heating element and sensing probe are straight thread screw types that utilize an O-ring to minimize leakage problems as is common with flat gaskets and NPT connections.

Note: All components are removable without disturbing any other component

Notes:

1. The 6, 7, and 9kw models in 208 and 240 volt can be field converted from either 1 phase to 3 phase or from 3 phase to 1 phase

Hubbell

2. All 3 phase units are factory wired as a balanced 3 phase unit.

Models are also available in 380, 415, 440 and 575 volt.
Please consult factory for exact KW selection in these voltages.

Formulas To Solve For: RECOVERY

GPH x	$^{\circ}$ F Δ T x 0.00244 = KW
KW x 410 ÷ GPH =	= °F Δτ
KW x 410 ÷	$ ^{\circ}F \Delta T = GPH$
Note: 1 KW will heat 4	.1 GPH at a 100 $^{\circ}$ F Δ T

METRIC CONVERSION

Liters x 0.2641 = Gallons Gallons x 3.79 = Liters Gallons x 0.003785 = m³ m³ x 264.2 = Gallons 1°C Δ T = 1.8°F Δ T

$^{\circ}F = (^{\circ}C \times 1.8) + 32$
$^{\circ}C = (^{\circ}F - 32) \times 0.556$
psi x 0.06896 = Bar
Bar x 14.5 = psi
psi x 6.86 = kPa

ELECTRICAL

 $\frac{KW \times 1000}{Volts} \div 1.73 = Amps 3$

 $\frac{KW \times 1000}{Volts} = Amps 1$

kPa x 0.1456 = psi Lbs x 0.4536 = Kg Kg x 2.2 = Lbs

Kg x 2.2 = LDS Watts/Sq.Cm. x 6.4 = Watts/Sq.In. Watts/Sq.In. x 0.155 = Watts/Sq.Cm.

Voltage De-Rating Factors

Rated Voltage	Applied Voltage	KW De-Rating Factor
600	575	92%
600	550	84%
480	460	92%
480	440	84%
240	230	92%
240	220	84%

When the actual supply voltage (applied voltage) is different than the booster design voltage (rate voltage) the resulting KW output will be affected. Please see the chart for typical voltage de-rating factors, or use the following formula:

 $\frac{\text{Applied Votage}^2}{\text{Rated Voltage}^2} \times \text{Rated KW} = \text{KW output at applied voltage}$

Typical Installation Diagrams

Plumbing Notes:

- 1. Dielectric couplings should be used in connecting dissimilar metals to prevent electrolysis.
- 2. No check valve may be installed in the supply line to the booster.
- 3. All shut off valves must be gate or ball valves not globe valves.
- 4. The brass pressure reducing valve with built-in bypass is adjustable from 25 to 75 psi.
- 5. To minimize heat loss and maximize efficiency, hot water piping should be insulated.

Hubbell

J Model Standard Accessories

J6 and J16 Boosters

- T&P Relief Valve
- Brass pressure reducing valve with built-in bypass
- (4) NSF approved plastic legs
- (1) Combination temperature and pressure gauge
- (2) Dielectric Unions

J4 Boosters

- T&P Relief Valve
- Side mounting bracket for securing booster to left or right hand side of dish machine

J3 Boosters

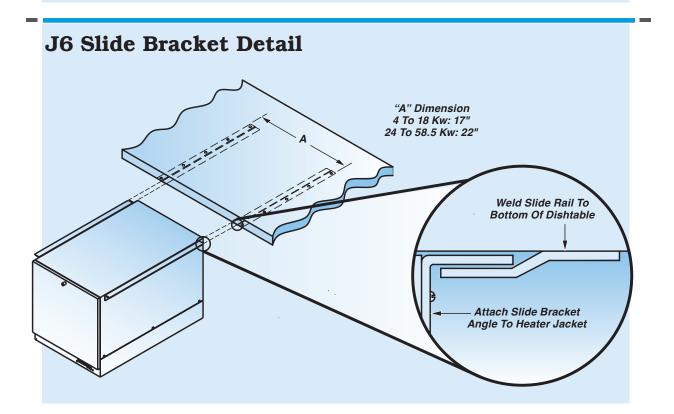

- T&P Relief Valve
- 24 volt booster heater interlock adapter

Water Quality Requirements

Recommended water hardness is 4 to 6 grains of hardness per gallon (GPG). Water hardness above 6 GPG should be treated by a water conditioner (water softener or in-line treatment). Water hardness below 4 GPG also requires treatment to reduce potential corrosion. Excessive GPG will result in higher operating and maintenance costs and will reduce product longevity.

Chlorides must not exceed 50 parts per million (ppm). Excessive chlorides will result in metallic corrosion and will reduce product longevity.

Water treatment has been shown to reduce costs associated with deliming the booster as well as reducing metallic corrosion. Product failure caused by these conditions is not covered under warranty. See warranty for complete details.

Optional Equipment

- 1. Slide Brackets: Available for the J6 model only, these brackets allow for mounting the booster heater under a counter. See slide bracket diagram for details.
- 2. Shock Absorber: Reduce the harmful pressures resulting from quick closing dishwasher solenoid valves by installing a shock absorber between the booster and the dishwasher.
- 3. Tamper Resistant Package: For prison and other secure facilities a tamper resistant package is available with all hardware tamper resistant type. Includes standard plastic legs unless otherwise specified.

4. Protective Cover: Keep your Hubbell booster free from dirt, debris, chemicals and excessive water with this removable form fitted protective cover. Velcro fasteners make it easily installed and simple to remove when service is required. Clear window allows visibility of Hubbell booster digital display.

5. Alternate Legs: Please specify type: Nickel plated die cast, stainless steel, stainless steel with flanged base for floor mounting.

- G. Water Treatment System: Provide superior mineral scale prevention and corrosion control by feeding a special blend of scale control compounds into the hot water stream before the booster. The in-line system to include a clear cartridge housing to allow an operator to view the cartridge and determine when it needs replacement without the need to open the system.
- 7. Alternative Voltages: Hubbell booster heaters are available in alternate voltages including 380, 415, 440 and 575 volt. Please contact factory for kW selection.
- 8. Low Temperature Interlock: This device is built into the booster and monitors water temperature and will trip an SPDT relay when water temperature drops below a set point (150 - 180°F) thereby preventing final rinse from activating.
- 9. Remote Alarm Adapter: This device installs into the Hubbell controller and provides remote alarm capability to indicate a reset fault condition. Commen/N.O./N.C. rated 220 VDC, 250 VAC, 2 amp max.
- 10. Remote Control Panel: This device allows you to install the booster in one location and have complete control of it (on/off, temperature adjustment, reset and temperature indication) from another location (200 feet maximum). Remote control panel is 5" x 2" x 3" and NEMA 4 rated.

Booster Sizing for a Low Temp Dishmachine

Chemical low-temp dishwashers are most effective when supplied with 140°F hot water. This water temperature may not be available due to an undersized primary water heater or local safety code. Hubbell J model boosters can operate as a pre-heater for chemical low-temp dishwashers to provide an adequate supply of 140°F hot water for proper operation. For temperatures other than the factory setting of 185°F, simply set the digital display to your desired temperature.

To properly size a Hubbell booster heater for

Iow temp use: 1. Determine th

- Determine the required temperature rise; the difference in temperature between your supply water temperature to your booster and your desired hot water temperature out of the booster.
- 2. Determine the water usage gallons per hour (GPH) by consulting the dishwasher data plate, literature or NSF listing.
- Select the appropriate kW based on 1 and 2 above using either the formula below or the Recovery Rating Chart on page 4.

Booster Sizing Formula:

Required Variables:

- A. Water usage in GPH
- B. Supply water temp in °F
- C. Desired water temp in °F
- D. Calculate the ∆T (remp rise) by subtracting C - B in °F

Formula to Determine KW:

	This selector chart is based upon 40) dearee F ;	and 70 deare	e F temper	ature rises.	

This selector chart is based upon 40 degree F and 70 degree F temperature rises, 20psi flow pressure and minimum rinse cycle timer setting in NSF listing.

All booster heaters are rated at 100% of the capacity of the dishwasher as recommended by the National Sanitation Foundation. Where make-up water for the wash tank is provided from the final rinse supply, chart recommendations are based upon this additional demand (not exceeding 2 GPM) as required by NSF.

Master Specification: Model J

JOB NAME

ENGINEER

REPRESENTATIVE

CONTRACTOR

Provide a quantity of ______ electric booster water heater(s) Model No. ______ as manufactured by Hubbell. The pressure vessel shall be all stainless steel welded construction and shall bear the ASME Section VIII stamp. The tank shall be insulated with CFC/HCFC free high efficiency closed cell foam insulation to reduce standby heat loss. To minimize operating expenses, heat loss shall not exceed 425 btu/hr.

The booster shall be listed and approved in accordance with UL Sanitation (NSF5) and UL1453. All controls shall be built-in and factory wired. The booster shall include internal resettable circuit breakers in lieu of one-shot power fuses for over current protection when required. The immersion heating elements shall be high quality screw plug type with O-ring gasket to ensure leak free long life service. All temperature, hi-limit, and low water operating functions shall be controlled by an electronic digital display solid state device that shall provide the operator with visual indication of temperature setting and fault conditions. For ease of service for any replaceable component, the positioning of all components shall be such that to remove any component does not require the removal of another component.

The entire exterior of the booster heater including the base, jacket and front cover shall be brushed stainless steel for maximum corrosion resistance, longevity and appearance.

The booster heater shall include an ASME/AGA rated combination temperature and pressure relief valve, 6" adjustable NSF plastic legs (Optional Specification: slide brackets on J6 model only), bronze body pressure reducing valve with builtin bypass, and one indicating temperature and pressure gauge.

The entire pressure vessel shall be provided with a full ten (10) year **Non Pro-Rated** tank warranty. The entire booster heater including all components shall be provided with a one-year warranty including parts and labor.

Sales and Service Network

An extensive network of authorized Hubbell Service Agents, Dealers, and Sales Representatives stand ready to support the needs of the Food Service Industry and to ensure that Hubbell Customers are provided with the highest quality in customer case and service.

Access Hubbell's website for a complete listing of authorized Hubbell Service Agents, Dealers, and Sales Representatives.

Complete Inventory Ready to Ship

Hubbell is committed to serving the needs of the Food Service Industry, including having the complete line of Hubbell booster heaters ready to ship the same day when an order is received by the factory by 12:00pm eastern time. Hubbell's investment in a state-of-the-art production facility and an extensive on-hand inventory ensures that our Food Service Customer's needs are met in a timely fashion.
