Immersed element models are the lowest cost alternative for electric fryers.

Tilt-up elements provide full access to the frypot for cleaning.

Robotic welding is precise, virtually eliminating leaks.

Stainless steel exterior (except back) is easy to clean and has a professional look.

IFS-40-E shown

ELECTRIC ELEMENTS - Elements are located inside the stainless steel frypot, below the fry zone.

- Element output is 14 KW.
- Two elements styles are available, immersed elements are the most economical, the tilt-up elements offer complete access to the frypot for cleaning.
- Direct heat-to-element contact heats oil quickly resulting in less absorption and better tasting food.
- Snap acting electronic thermostat has a 200°F - 400°F. (93°C - 204°C) temperature range that extends oil life and produces a uniformly cooked product.

LARGE COOL ZONE - Captures and holds particles out of the fry zone.

- Reduces taste transfer.

STAINLESS STEEL FRYPOTS - Large 14" x 14" (356 x 356 mm) frying area.

- Frypot sides are robotically welded stainless steel to virtually eliminate leaks.
- Fine mesh wire crumb is included.
- Deep drawn bottom facilitates draining, slants toward the drain.
- 1-1/4" (32 mm) full port drain valve empties frypot quickly and safely.
- Two large, nickel-plated fry baskets with vinyl coated, heat protection, handles are included.
- Basket hangers are stainless steel.

EXTERIOR FEATURES - Stainless steel front, door, sides, basket hanger and frypot.

- Welded and polished stainless steel seams.
- Full heat shield protects control panel.
- Full bottom chassis provide structural support.
- Plate mounted 6" (152 mm) heavy duty stainless steel legs or optional casters assure secure support.
- One year parts and labor warranty. Limited warranty on frypot, stainless steel frypot is five years pro-rated.
