Metro Divider Boxes

METRO® DIVIDER TOTE BOX LINE

The Metro® Divider Box line offers safe and efficient storage of items in bulk or compartmentalized models with the use of optional dividers. Metro® Totes, and Accessories are available in any of three different materials to meet the specific needs of today's parts handling requirements.

NAT - Refers to natural polypropylene-base resin products. They are impact resistant, durable and have a high chemical resistivity. The standard color for any product ordered with this suffix is gray.

CAS - Refers to Bentron™, a conductive polypropylene-base material. This material contains a carbon additive to provide an electrically conductive path through the material. Bentron has a surface resistivity of less than 10^2 ohms/sq. All products with this suffix are black in color.

BAS - Refers to Benstat™, Metro's patented static dissipative polypropylene-base material. Benstat has a surface resistivity of more than 10^7 ohms/sq. and less than 10^{12} ohms/sq. The standard color for any product with this suffix is blue.

FEATURES:

- Fabricated from injection molded, polypropylene base resins
- 12 sizes available
- Stackable with and without covers
- Multiple height dividers available
- Optional card holder snaps on all boxes
- Large, smooth label areas on all 4 sides

BENEFIT:

- Durable, high impact strength**
- Maximum space utilization
- Easy and efficient storage**
- "Customized" tote interior for your exact needs
- Provides easy identification**
- Easy to affix labels and bar codes
