

KLOPPENBERG

■ SINGLE DOOR UPRIGHT BIN ■

To suit your specific needs, our single door upright bin is available in eight configurations. See other side for product details.

FEATURES

- Available in both our "S" and "SBB" exterior styles. (S = Stainless steel front and sides with a galvanized back and bottom. SBB = stainless steel front, sides, back and bottom.)
- Poly bin liner is 5/16" thick polyethylene rotomolded in one piece, seamless construction with cove corners.
- Bin liner has 1 1/2" (2" on bottom) foamed-in-place insulation in all walls, providing maximum ice preservation.
- New rotomolded pouch and door assembly, is dent and scratch resistant. Provides excellent thermal break. Doesn't sweat. Pouch door size is consistent throughout all upright bin models, regardless of width. Ice baffle resets by closing bin door.
- All stainless steel is 300 series.
- Factory installed drain is a 1" IPS plastic drain.
- Bin top is cut to suit the icemaker of your choice and is fully gasketed.
- View windows provide instant inspection and thermal break.

BENEFITS

- Pouch style door assembly is shipped inside the bin to provide a narrower bin for easy delivery through doorways. (Installs in seconds with no tools.)
- The pouch style door provides maximum access and minimal spillage with buckets or scoops.
- Clips on bin front provide for convenience and safety, keeping doors open while accessing ice.

STAINLESS STEEL EXTERIOR STANDARD!

KLOPPENBERG offers this solution to your ice storage challenges. The bin design allows for maximum durability and storage in minimal space dimensions. When it has to last—it has to be KLOPPENBERG!
