

DFW Deluxe Food Warmer

DFW-100

DFW-200

DFWT-100

DFWT-200

Serve hot food quickly with just the push of a button. The Deluxe Food Warmer uses plain tap water to heat and cook foods. The generator converts water into super-heated dry steam that fully penetrates foods from all sides to keep the original textures, colors, flavors, and nutrients. Use it to prepare a variety of different menu items, including pastas, breads, meats, seafood, poultry, eggs, and vegetables.

Simple push-button action delivers a fully adjustable pulse of steam. Because the amount of steam is consistent, it removes the guesswork and produces a uniform finished product from one operator to the next.

NOTE: Units with a direct water hookup require a water pressure regulator. The psi should be between 20 and 30.

Features

- Compartment steamer with half or two-thirds size pan capacity.
- Stainless steel construction.
- Fully adjustable pulse of steam.
- Consistently finished product.
- Instantly turns plain tap water into super-heated dry steam.
- Models available with either a self-contained water reservoir or direct water hookup.
- Safety steam release valve.
