

Stainless Steel Electronic **RICEMASTER**

57130 30 Cups, 120v*

57131 30 Cups, 230v*

* refer to chart for liquid capacities (pg.45)

Cook and serve from the same unit. Automatically cooks rice to perfection and keeps it hot for serving. The insulated double wall body has heating elements to more evenly warm rice than a bottom heat only rice cooker. The hinged, heated cover reduces heat loss. The attractive stainless steel exterior is easy to clean. Made by Town in the USA with industrial components.

Additional features include cook and hold lights, condensate collector, vented cover, silicon rubber cover gasket, oil/water/grease resistant 14 gauge 3 wire electric power cord, rice cup, and paddle. This RiceMaster will cook different kinds of rice. Our Owner's Manual provides a good guide. With practice, you will perfect the correct proportions of rice to water for your preferred type of rice.

Features

- Electronic Cook and Hold
- Touch controls
- Auto reset overheat protection
- 1/8" thick rice pot
- On/Off Touch Switch with power indicator
- NSF listed for cook *and* hold.
- Two Year Limited Warranty (warranty starts from Town's date of invoice)

Steamed rice is only the beginning

Included in the manual are recipes for rice: Rice Pilaf, Jambalaya, Sweet Rice and Mexican Rice.

Features

- **Cook, Hold, and Serve**

A hinged cover unit that will cook, hold, and function as a serving unit.

- **Durable**

20 gauge stainless steel body is dent resistant and easy to clean. The riveted internal cover stays secure. High impact hardware, American made industrial components.

- **Hi Limit Protection**

Hi limit prevents breakdown if the unit overheats. Cooking is completed without damage to the rice cooker.

- **Touch Controls & Indicator lights**

First touch the ON/OFF button and the unit turns on in the "hold" mode. Both the power and the hold indicator lights will be illuminated. A touch to the PRESS TO COOK button starts the cook cycle. The hold light will go out and the cook light will illuminate. When the rice is cooked the cook light will go out and the hold light will illuminate, indicating the rice is cooked. Unit stays in warm mode until turned off or another cook cycle is started. Touch the power button at any time to turn the unit off.

- **Automatic Cook and Hold Operation. Touch the Button, Walk Away for Perfect Rice Every Time**

An electronic sensor in the heater plate detects when the water has been absorbed. This will end the cook cycle at the right time. RiceMaster® switches to "hold" automatically when cooking is done. Rice will be held at an NSF compliant 150°F+. Holding time should not exceed 12 hours.

- **Vented Cover with Condensate Collector**

The cover vent lets steam escape. A condensate collector below the hinge traps escaped water to keep the unit and the counter clean.

- **Removable ⅛" thick Rice Pot**

Resists dents, removable for rinsing rice and washing.

- **Cup Capacity is Asian cups**

Rice cooker capacity in Asia is measured by 6 ounce (by volume) cups of raw rice. Town Rice-Masters use that standard. We also provide capacity by weight above.

- **Commercial ETL and NSF listed**

Large capacity. Electronic controls. Designed and built for commercial use.

- **Assembled in the USA with American made Industrial Parts**

- **Two Year Warranty** (page 111)
