STEAMER RANGE & CABINET

GENERAL

The Town YF-STMR is a gas fired two compartment steamer range. It is self contained and requires only gas and water connections. The unit features "Town AutoFill" which will automatically maintain the proper water level in the steam tank and insure copious steam production. The unit is NOT thermostatically controlled. The primary usage is for cooking Asian foods, such as dumplings or dim sum. Foods such as whole fish or soup can be steamed in this unit. It can be used to cook any food that requires high, continuous, steam heat. Exterior of unit is constructed in 304 Stainless Steel. The steam generation tank is Stainless Steel, which has cast iron heat plates mounted on the tank bottom for faster heating and long tank life. The doors are double wall, insulated, complete with a positive latching mechanism. The interior fire chamber is constructed in steel angle iron and is fully insulated by 1" thick fiber ceramic material. Unit is fired by a high power 32 tip jet burner (116 MBTUH). A pilot safety gas valve is provided. The unit can be customized with different body and cabinet sizes, as well as custom dim sum steamer plates.

MODELS

The base model is YF-STMR-SS. Natural or Propane fuel models are available.
