Specifications

Hardware, Insulation and Construction

Exterior sides, front, door and top interior are constructed of stainless steel. Exterior back and bottom are constructed of heavy gauge galvanized steel. Door is equipped with a cylinder lock and guaranteed-for-life cam-lift, self-closing hinges with stay open feature at 120°. A full width metal door handle/gasket guard is provided (TBC5). Guaranteed for life work-flow, door handle is mounted horizontally over recess in door which limits protrusion from door face into aisle ways (TBC13). Gasket profile and Santoprene® material simplify cleaning and increase overall gasket life. Anti-condensate heater is located behind door opening. TBC5 Door is hinged right and TBC13 Door is hinged left as standard. Both cabinet and door are insulated with high density, non-CFC foamed in place polyurethane.

Refrigeration System (TBC5)

A High capacity refrigeration system using R-404A refrigerant is coupled with an advanced air circulation system within the food zone in order to promote rapid chilling. It features an easy-to-clean front-facing condenser, thermostatic expansion valve, high speed evaporator fan, air-cooled hermetic compressor, large, high humidity evaporator coil and a non-electric condensate evaporator. A 9' cord and plug is provided. Standard operating temperature in automatic refrigeration mode is 34 to 38°F.

Refrigeration System (TBC13)

Dual refrigeration systems are utilized in order to prevent short cycling, providing for energy efficient operation and maximize compressor life. These combine their efforts through a unique air circulation system within the food zone. During Blast Chill cycles both systems are in full operation. At the completion of any chill or freeze cycle, one refrigeration system remains in use to maintain proper refrigerated storage temperatures. Each unit requires a floor drain or optional condensate evaporator for condensate removal.

Interior (TBC5)

Standard interior arrangements consist of 5 pairs of wire tray slides, each pair (level) can accommodate (1) $12^{\circ} \times 20^{\circ} \times 2\frac{1}{2}^{\circ}$ pan (10 maximum) or (1) $18^{\circ} \times 26^{\circ}$ pan per level (5 maximum).

Interior (TBC13)

Standard interior arrangements consist of 13 pairs of tray slides, each pair (level) can accommodate (2) $12^{"} \times 20^{"} \times 21^{'}_{2}$ pan (26 maximum) or (1) $18^{"} \times 26^{"}$ pan per level (13 maximum).

Blast Chill Operation

In **TBC5** Blast Chill mode the high capacity refrigeration system, in conjunction with a dual-speed blower fan combine to provide product temperature as low as -27°F. In **TBC13** Blast Chill mode both refrigeration systems, as well as two blowers are in operation. Cabinet air temperature can be as low as -27°F. The control closely monitors both the air and product temperatures to assure rapid chilling without freezing. The operator is notified upon completion of each chill cycle, and the unit automatically begins to maintain proper refrigerated storage temperatures. **Controller**

HACCP documentation is facilitated by one on-board printer which records all required product chill cycle information. This same data can also be downloaded through a USB Port.

Warranties

The unit is standard with a three year parts & labor warranty on all components and the cabinet, and an additional four year parts only warranty on the compressor(s).

DIMENSIONAL DATA	TBC5	TBC13		
Cabinet Type	Undercounter	Reach-In		
Net Capacity cu. ft.	9.2 (267 l)	18.3 (518.2 l)		
Number of Pans 12" x 20" x 2 ¹ / ₂ "	10	26		
Number of Pans 18" x 26"	5	13		
Length - Overall in.	54 (137.2 cm)	41 (104.1 cm)

NOTES:

1. Unit requires condensate removal via a floor drain or optional electric condensate evaporator kit. See form TR35801 for more information. (TBC13)

2. Unit requires a dedicated circuit for proper operation.

3. Figures in parentheses reflect metric equivalents.

4. 5 1/2" Clearance for sides and back @ 105F degrees or less & 3" Clearance for sides and back @ 86F degrees or less (TBC13)

Equipped With One NEMA 5-20P Plug (TBC5)

Equipped With One NEMA L14-20P Plug (TBC13)

NOTE: When ordering please specify: Voltage, Hinging, Options and any additional warranties. **Continued product development may necessitate specification changes without notice. Part No. TR35929 (revised 7/13)**
