# Glass Door Merchandiser

**Glass Door Merchandisers** Refrigerators

**Model: TGM-35R** 

## \_\_\_FEATURES / BENEFITS =\_\_

### **■ ENERGY CONSERVING FAN CONTROL**

Utilizing algorithmic air circulation for optimal temperature levels, our innovative fan control system conserves energy by at least 15% and increases compressor life by up to 30%.

#### ■ HOT GAS CONDENSATE SYSTEM

Through Turbo Air's creative innovation, the condensate system surfaces have been specially treated to resist corrosion. This not only increases efficiency without the risk of refrigerant leakage from corrosion, but also prevents the overflow of condensate water.

#### **■ EFFICIENT REFRIGERATION SYSTEM**

Turbo Air's glass door refrigerators are designed with oversized and balanced (CFC Free R-134A) refrigeration systems. These include efficient evaporators and condensers for faster cooling and greater efficiency.

#### **■ TASTEFUL AND MODERN APPEARANCE**

The design of our products is one of our top priorities. Whether you have a restaurant, bar, convenience store or gas station, Turbo Air refrigerators will compliment the appearance of your operation.

#### ■ MAGNETIC DOOR GASKETS

Magnetic door gaskets are of one piece construction, removable without tools for ease of cleaning and replacement.

### ■ DOUBLE PANE GLASS DOORS WITH HEAT REFLECTING FILM

Equipped with unique double pane glass doors with a layer of patented, transparent thermal insulating film applied between the two glass layers. Lightweight door construction reduces door maintenance and roller wear, and facilitates smooth door opening.

## ■ ADJUSTABLE, HEAVY DUTY, PE (POLYETHYLENE) **COATED WIRE SHELVES**

#### ■ HIGH-DENSITY POLYURETHANE INSULATION

The entire cabinet structure is foamed-in-place using high density, CFC free polyurethane insulation.

#### **■ ERGONOMICALLY DESIGNED DOORS**

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. These features along with self-closing doors make this the ultimate choice in customer convenience.

#### **■ BOTTOM MOUNT COMPRESSOR UNITS**

Turbo Air's bottom mount compressor allows easier access for service and extra storage space above. In addition, the lower area provides a cooler and less greasy operating environment which results in reduced compressor running time.

REFRIGERATOR HOLDS 33°F ~ 38°F FOR THE BEST IN BEVERAGE PRESERVATION
