VBCF CABINET CONSTRUCTION

AISI 30418/10 stainless steel construction on external sides, top, and interior. Die-formed interior floor has rounded corners and central drain for easy cleaning. High density foamed in place CFC and HCFC free expanded polyurethane insulation (2.4" thick). Anti-condensation perimeter heating around door opening. Non toxic epoxy coated evaporator coil. One, heated, high precision 4 point multi-sensor core probe and adjustable stainless steel legs are standard.

VBCF DOOR CONSTRUCTION

Ergonomic vertical door handle and door are made of AISI 304 18/10 stainless steel. Snap in place magnetic gaskets Self closing doors with hold open stop at 100°.

VBCF REFRIGERATION SYSTEM

The self-contained refrigeration system uses R404A refrigerant and features a hermetically sealed compressor with overload protection. An evaporator fitted with a high flow rate fan insures maximum cooling efficiency. Indirect air flow assures highest product quality. Manual defrosting with door open on a timed cycle.

VBCF INTERIOR STORAGE ARRANGEMENTS

Stainless steel wire guide rack allows for maximum air circulation and can be easily removed without tools for cleaning. See specific model characteristics for pan capacity (number of pans and sizes). Pans not included. Spacing between pans is on 2.56" centers.

VBCF ELECTRONIC CONTROL SYSTEM

Highly visible and ergonomically positioned (recessed inside the door) electronic control with LCD display insures precise control of Blast Chilling (194° F to 37° F in 90 Minutes) or Shock Freezing (194° F to 0° F in 240 Minutes) Cycles. One touch hard and soft automatic blast chilling or shock freezing cycles based either on core probe temperature or timed cycle. Automatic recognition of the core probe and automatic conservation mode at the end of a cycle. One touch display of HACCP Alarms (power failure, cycle time out of HACCP required time, high temp, low temp) recorded in memory. The real time clock provides date, time, and duration of HACCP alarms (power failure, cycle time out of HACCP required time, high temp, low temp) recorded in memory. Will record up to 10 alarm events before over writing the first alarm and will keep the data for a minimum of 48 hours in case of a power failure. On board program memory holds 99 total programs. Adjustable Evaporator Fan Speed button allows for regulation of the fan during the blast chilling or shock freezing cycle. Compressor protected by overload cut-out with automatic reset. Micro-switch control cuts out the evaporator fan and compressor whenever the door is opened.
