Installed	18	8
Shipping	22	10

## Features

- **Warming pan is deep drawn, stainless steel** for maximum strength and durability.
- **The tubular elements**, located under the warming pans, allow for quick heating.
- **Control** is recessed in a one piece, die stamped stainless steel, remote panel to help prevent accidental temperature changes.
- **The tubular element**, located under the warming pan, allows for quick heating.
- **The positive-off thermostat (T)** controls the element allowing for adjustable and more consistent temperatures. A signal light indicates that the heating element is energized.
- **Fully insulated** for greater efficiency.
- Warmers are designed for **wet or dry operation**.
- Models available with **optional drain (D)**.
- The BMW-206ULRT warmer is **Underwriter’s Laboratories, Inc. LISTED** and meets NSF International and Canadian standards.
- **A one-year warranty** against defects covers parts and labor.
